Características de nuestros productos

El fuelle es un protector que evita la pérdida de lubricación y la penetración de agentes externos, los cuales producen desgaste mecánico, ocasionando la rotura prematura de los mismos.

Para la fabricación de nuestros productos utilizamos los mejores materiales, cumpliendo fielmente las exigencias que requieren las partes específicas del automóvil, afectadas a la acción de hidrocarburos y envejecimiento por exposición natural.

El tope de compresión juega un papel determinante en la vida útil del amortiguador, evitando impactos metálicos y recorridos no deseados.
